

SRR Supports Augusta Engineering Magnet School

Metro Courier News, Augusta, GA
February 24, 2011

Savannah River Remediation (SRR) is reaching out to area students by partnering with A.R. Johnson Health Science and Engineering Magnet School. The partnership is aimed at mentoring students who may eventually find jobs at Savannah River Site (SRS). On February 15, SRR Operations and Deputy Project Manager Dave Olson, center, presented a \$3,000 check to A.R. Johnson student and administration. Also pictured from left are: Jarrett Sims, Mike Scruggs, Adeline Capps, Devin Carter, Rana O'Bryant of SRR, Dr. LaMonica Lewis, A.R. Johnson principal; Mr. Olson, Aleksandriya Holiday, assistant principal; Sandra Johnson, engineering teacher; Jarrett Caldwell, Austin Whiting, Krista Holbien and Tariq Cannonier. The students are members of the school's Technology Student Association. The money will be used to the school's math and science programs; and its first-year Robotics Team. "It's important to our country to bring more students into the science and engineering pipeline. They are our lifeblood," said Mr. Olson.
